MUHAMMAD FAHMI

+6281277534069 | fahmianton@gmail.com | github.com/mweh
Jakarta, Indonesia

iOS Engineer with experience building scalable native apps in fast-paced agile teams. Specializes in performance optimization, concurrency, and reusable architecture. Skilled in structured code reviews and collaborating with cross-functional teams using GitLab, Confluence, and Jira.

Experiences

Revigurize - **Netherland** Dec 2025 - Present

iOS Developer - Freelance

- Led the migration of React.js-based product features to native iOS using Swift and UIKit, integrating existing full-stack services and successfully delivering App Store-compliant releases.

Qita by BRI - **Jakarta, Indonesia** Jun 2025 - Apr 2026

iOS Developer - Contract

- Revamped BRImo's legacy UI into a modern, improved user experience using UIKit and SnapKit, aligning with new design standards.
- Optimized performance by cleaning legacy code, refactoring UI flow, and resolving inefficiencies in view rendering and logic handling.

RaiseCall - **Jakarta, Indonesia** Jan 2025 - May 2025

Fullstack Developer - Fulltime

- Implemented new features and resolved bugs using React and Node.js on multi-tenant CRM platform

MyTelkomsel - **Jakarta, Indonesia** Sep 2023 - Feb 2025

iOS Developer - Fulltime

- Cut utility page load time from 7s to 0.5s using identifier-based caching and Instruments, improving tab switch responsiveness across N, N+1, and M+1.
- Collaborated with SUSE and FMC squads across Product Owner, Solution Architect, iOS, Android, Web-API, and QA teams to deliver core feature sets.
- Delivered high-impact features and bug fixes using MVVM+C, RxSwift, UIKit, and SnapKit—aligned with business goals under Agile sprints using Jira and Confluence.

Meat Solution @ MyEduSolve - **Jakarta, Indonesia** Aug 2021 - Dec 2022

iOS Developer - Internship

Completed a 5-month MyEduSolve program focused on mastering iOS development through real-world projects, best practices, and international certifications—designed to meet modern industry standards.

- Developed "Meat Solution," a SwiftUI-based e-commerce iOS app as part of MyEduSolve's capstone, delivering a real-world solution for a client in the meat distribution industry.

Fakultas Ilmu Komputer - **Universitas Muslim Indonesia** Feb 2021 - Jul 2022

Computer Lab Assistant - Volunteering

- Assisted students with hardware and software issues while also supporting learning sessions on databases, programming languages, data structures, mobile, and fullstack development as a Computer Lab Assistant.

Education

Apple Developer Academy - **Indonesia** Feb 2026 - Dec 2026 (Expected)

- Built and shipped iOS applications as part of the Apple Developer Academy Indonesia, focusing on real-world product development, collaboration, and agile delivery.

Universitas Indonesia - **Jakarta, Indonesia** Sep 2021 - Nov 2021

Undergraduate Micro Credentials for Student Learning Beyond Campus, Computer Science

- Completed the Network Security Pen-Test Course under the KMMI Program in collaboration with the CISCO Networking Academy.

Technische Universität Darmstadt - **Darmstadt, Germany** Jan 2015 - Aug 2016

- Studienkolleg (a prep college in Germany designed for international students)

Universitas Muslim Indonesia - **Makassar, Indonesia** Sep 2019 - Feb 2023

Bachelor of Computer Science, 3.98/4.00

- Magna Cumlaude

Certificate

Dicoding Indonesia - Prinsip Pemrograman SOLID	Feb 2025
GitHub - GitHub Foundations	Sep 2024
Udemy - iOS & Swift - The Complete iOS App Development	Jan 2024
Apple App Dev w/ Swift (Certified User & Associate)	Dec 2022
Cisco and Universitas Indonesia - CyberOps Associate	Nov 2021
BNSP - Junior Mobile Programmer	Oct 2022

Skills & Scholarly Publication

- **Hard Skills** ✓: IELTS 6.0, UIKit, SwiftUI, RxSwift, MVVM-C, SnapKit, Instruments, Debugging, DSA, Git, Firebase, REST API, Agile, Jira, Confluence, Docker, Postman, Mockoon, Redis, VPS
- **Soft Skills**: Critical thinking, team collaboration, fast learning, ethical & responsible
- **Deeplearning - BISINDO alphabets Recognition** ✓ (2023): Published in peer-reviewed academic journal (2023)", a real-time BISINDO (Indonesian Sign Language) alphabet recognition app using TensorFlow + MobileNet, trained on a custom dataset to enable live visual translation via camera input.
